Accounting Education: an international journal is a peer-reviewed international journal devoted to publishing research-based papers and other information on key aspects of accounting education and training of relevance to practitioners, academics, trainers, students and professional bodies.

It is a forum for the exchange of ideas, experiences, opinions and research results relating to the preparation of students for careers in public accounting, managerial accounting, financial management, corporate accounting, controllership, treasury management, financial analysis, internal auditing, and accounting in government and other non-commercial organizations, as well as continuing professional development on the part of accounting practitioners. The coverage includes aspects of accounting education and training policy, curriculum issues, computing matters, and accounting research as it impinges on educational or training issues.
